

*"Sometimes, to go someplace new you need a different kind of leader than what brought you to where you currently are. That 'something different' is what I saw in Elizabeth."*

- **Rowan Trollope**, CEO, Redis

## Consulting and Strategic Advisory

Over 30 years ago, Elizabeth led her first team and became passionate about the multiplying effect that unlocks dormant potential when people are connected to a mission and a leader empowers them to bring that mission to life.

For the last 20 years, Elizabeth has applied that passion to the intersection of people and technology, leading bleeding edge innovations in computer vision and artificial intelligence. She views technology as a powerful tool to bring people together and facilitate connection.

Having held executive leadership roles ranging from non-profit to Fortune 100 organizations, and having founded her own ventures as well as worked on inter-company strategic alliances across technology supergiants, she is uniquely gifted at filtering through noise and chaos to find the actionable nugget and chisel it down to elegantly simple clarity.

Clients say Elizabeth is "refreshingly direct" with a "contagious passion and an awesome ability to lead." Her approach is that of a coach, confidante, and trusted advisor, meeting clients and partners where they are and coming alongside them on the journey.

Her advisory work can also be supported by her organization's coaching and training programs to help you bring this work to your team and workforce to scale seamlessly.
